

Phase 2: System Analysis and Design Deliverables

1. System Analysis

- Identification of system stakeholders (Actors)
- List of system requirements (Functional & Non-functional)
- Use Case Diagram
- Detailed Use Case Descriptions

2. System Design

- High-Level System Architecture
- Class Diagram
- Sequence Diagrams
- Activity Diagrams

3. Database Design

- Entity Relationship Diagram (ERD)
- Database Schema (Tables, Attributes, Relationships)
- Data Dictionary (optional)

The submission will take place this week. Each student is required to submit their work during their assigned lab session, where it will also be discussed.
